EDUCATION

New York University – M.S. in Engineering(GPA 3.9)

Sep 2025 – May 2027

Relevant Coursework: Product Management, Data Analytics, AI for Security

John Jay College – Computer Science (GPA 3.6)

Aug 2023 – May 2025

Relevant Coursework: Product Management, User Research, Data Analytics, Machine Learning

EXPERIENCE

AI Initiatives Project Coordinator

Feb 2026 – Present

Student Success and Innovation Team, John Jay College (SASP), New York, NY

- Built AI Literacy Site and leading AI initiatives across student success programs, increasing student engagement **12%** across events, Summer Bridge, and first year seminar workshops
- Co developed a cross department communications dashboard with the Director of Undergraduate Foundations, aligning student outreach across org wide
- Designing and building two AI tools for student success: a Copilot Studio agent that rewrites outreach in strength based language, and an advising assistant that acts as first contact advising assistant for graduating seniors

Student Marketing Ambassador

Oct 2025 – Present

JobRight.ai, Remote

- Own content strategy and daily execution for JobRight.ai, generating **50,000+** monthly impressions and growing audience to **6,000+** followers
- Redesigned post format (hooks, concise copy, consistent CTA) based on data and marketing team feedback, applying iterative testing to identify high converting patterns
- Identified and replicated a high performing post structure that drove 41% of a month's total content-attributed signups from a single post, informing ongoing strategy

Founding AI Product Manager

Jan 2025 – July 2025

Mela AI (pre seed), Remote

- Took Mela AI from 0→1 alongside the founder, owning product strategy, roadmap, and launch for the v2 platform
- Diagnosed onboarding as the core drop-off point and deprioritized new features to rebuild it, cutting dropout from 40% to 6% and lifting profile completion to 85%
- Made build vs fix and scope trade-offs across engineering and design, working in the codebase directly to ship core features and balance speed against technical debt
- Built the product roadmap from competitive and market research, prioritizing features by user impact and effort

Co-Founder

July 2024 – Dec 2024

Curate AI, Remote

- Co founded an AI startup that turns resumes into portfolio websites, taking it from idea to launched product on a 3 person founding team
- Owned go to market, acquiring **50+** users and converting **2** to paying customers within the first month of launch
- Pitched CurateAI to investors and a unicorn founder after being selected from **~1,000** teams in the Headstarter AI Fellowship

PROJECTS

AI Powered Dashboard & Call Automation — Pam AI (Headstarter Fellowship)

- Drove product delivery for a 4-person hackathon team building an AI receptionist feature for car dealerships, owning documentation, timelines, and submission while engineers focused on the build
- Kept scope and priorities aligned across the team as requirements shifted, translating hackathon updates into clear next steps so the team shipped a complete product on deadline
- Team's prototype was merged into Pam's early codebase; Pam now serves 800+ dealerships

TikTok Brand Strategy Externship

Feb 2026 – April 2026

LEAP, mentored by Tara Pettus (former TikTok/Apple/Meta exec), Remote

- Synthesized a fragmented competitive landscape into an end-to-end brand strategy for an e-commerce client, from positioning analysis through a client-ready Brand Playbook, under mentorship from a former TikTok/Apple/Meta executive
- Built a complete brand voice and visual identity system (tone framework, TikTok template pack, caption frameworks) enabling repeatable, on-brand content production
- Independently delivered a full go-to-market content package, competitive analysis, pilot content calendar, and pitch-ready brand playbook

SKILLS

AI & Building: Microsoft Copilot Studio, Prompt Design, LLM Evaluation, Vibe Coding (Lovable, Replit, Claude), RAG Chatbots, Vibe Coding

Product & Strategy: Product Strategy, Roadmapping, Prioritization, User Research, Go to Market Strategy, Stakeholder Management, Cross functional Delivery, A/B Testing

Growth & Research: Growth Experimentation, Competitive Analysis, Market Research, Funnel Analytics

Tools & Data: Figma, SQL, Excel, Power BI, Data Visualization, Notion, Asana

Research: Co-authored AI/ML papers in cybersecurity: propaganda detection (ILA 2026), hybrid intrusion detection
